Re: OU 11 Final Workplan

Dear Mr. Baughman:

The plan in general is much improved from the draft version, and we are hereby recommending CDH approve it. Several issues we feel should be clarified and/or taken into consideration during execution of the field program are presented in the attached comments. Additional necessary efforts identified as work proceeds can be added to the program by amending the plan with technical memoranda.

The development of exposure scenarios, contaminants of concern, and ARARs need to be coordinated with ongoing work within OU 1 and the Risk Assessment Technical Working Group, and updated as necessary to remain consistent with current thinking on these issues.

If you have any questions, please contact Bill Fraser at (303) 294-1081.

Sincerely,

A handwritten signature in dark ink, appearing to read "Martin Hestmark".
